p.3

## Insights

Check out the current best sellers in New Naval's e-shop and keep up-to-date on New Naval's industry insights.

p.4

## Covid-19 Update

New Naval has implemented all mandated protocols and upgraded safety guidelines, while continuing to deliver the highest caliber equipment to our clients in Greece and abroad.

## ScorSkim 90

New Naval's updated ScorSkim 90 is an oleophilic, free-floating oil recovery skimmer designed for oil recovery operations in varying environments and scenarios, including offshore conditions. With the capability to recover light to heavy oils the skimmer also utilizes an integrated, onboard pump. The 3-bank, modular system can be quickly changed from brush, disc or drum recovery banks depending on the viscosity of the target oil.

“

Protect the  
Seas,  
Upgrade Life.

”

New Naval's R&D and Technical Team built the state-of-the-art ScorSkim 90 and ScorLip 205 to tailor-made technical specifications intended for large, offshore recovery operations. The full recovery systems are part of multiple complete OSR Equipment Packages that were prepared and shipped to end clients in Korea and Tunisia.

## ScorLip 205 Weir

The ScorLip 205 Weir Oil Recovery Skimmer is a technologically advanced system operated by a remote-control, equipped with an on-board pump and thrusters that allow strategic positioning during operations. The large, self-adjusting weir lip conforms to the waterline providing excellent wave-following characteristics.

## Bodo Clean Up

One of New Naval's latest projects centers on the provision of emergency oil spill equipment, including the Scorpion C-Series Curtain Boom, for the massive Bodo Clean-Up (Phase 2), and Remediation project in the Bodo, Rivers State in Nigeria for an 18-month period.

## Mauritius

An order of New Naval's emergency spill response equipment was air-freighted to the recent Mauritius spill to assist with initial response efforts. A large quantity of in-stock response equipment was quickly prepared and immediately dispatched. The equipment included Scorpion Sorbents (Pads, Rolls, Booms, Socks) and Scorpion Containment Booms.

## Nile River

New Naval's Scorpion F-Series Fence Boom was recently installed and successfully tested as a preventative antipollution measure by the Egyptian Water Company in the Nile River. The antipollution project was commissioned through the reputable Egyptian Response company, IEMS.

# MARPOL Regulations

MARPOL Standard OCS Spill Kits are now available online in New Naval's e-shop, where you can also find technical information for varying types and sizes of Spill Kits, Sorbents and Ancillary Equipment for Oil, General Purpose and Chemical (HazMat) spills.

## Our Network

With a Global Network of partners and agents in 31 countries, New Naval provides environmental equipment solutions, 24/7 emergency response and preventative services to 17 industries. Contact us for more information regarding partnerships or opportunities in your area.
