

# ScorStore Boom Crate

## CRATE FEATURES

- Compact storage minimizes space requirements
- Crate is ideal for rapid deployment and recovery operations of a variety of booms
- Permeable floors provides drainage and ventilation
- Stackable
- Optional rapid-deployment rails (racks) for F-Series Fence Boom

The ScorStore Boom Crate is a compact and convenient long-term storage and transportation solution for Scorpion Floating Containment Booms A-Series, C-Series and F-Series models. Storage crates neatly contain and protect boom, while doubling as a system that boom can be deployed from and recovered to. The crate can be fitted with rapid-deployment rails (racks), for fast deployment of Scorpion F-Series (Fence) Boom with minimum personnel required. Racks allow the boom to be stored in a very compact arrangement and keep the boom ready to deploy in an emergency response.

- The crate is manufactured with hot-dip galvanized (HDG) steel, marine-grade aluminum or stainless steel.
- A punched floor plate provides excellent drainage and ventilation of the stored boom.
- Forklift slots and lifting eyes promote easy lifting and transport operations.
- Compact dimensions make the crates easy to handle and allow them to be stacked, reducing storage space requirements.
- Custom options depending on the boom type and operational needs are available, including containerized options.
- An optional cover provides increased protection.

## TECHNICAL SPECIFICATIONS

Boom Capacity	Length	Width	Height	Weight	Material**
<b>120m Scorpion 750</b>	2200 mm	2000 mm	930 mm	90 kg	HDG
<b>120m Scorpion 920</b>	2200 mm	2000 mm	1140 mm	92 kg	HDG
<b>120m Scorpion 1150</b>	2200 mm	2000 mm	1370 mm	95 kg	Painted
<b>150m Scorpion 750</b>	3000 mm	2000 mm	930 mm	98 kg	HDG
