

ScorAnchor Boom Set

SET FEATURES

- Complete anchoring set
- Maintains boom configuration and containment
- Secures the boom in place
- Stabilizes boom
- Customized to boom arrangement; anchoring plans available

The ScorAnchor Boom Set includes all necessary components for quick anchoring operations of many types of boom. Anchor kits can be customized to operation scenarios and environments. Anchoring systems help maintain the configuration of the boom and in turn guarantee containment by keeping the boom shape and the boom in place, ensuring a successful boom installation. Securing and stabilizing the boom in position is fundamental to a successful operation, an anchoring system provides this control. New Naval can provide boom anchoring plans specific to operational needs.

Oil Boom Anchoring Set consists of:

- Anchor – 12kg, 15kg, 20kg, 30kg standard weights; custom tailored options are available
- Chain link and shackles
- High quality rope
- High-visibility buoy
- Swivel
- Snap hooks
