The ScorTank DT-5 Modular Decontamination Tank is an air-inflated decontamination unit that features three separate compartments. The tank is suitable for the collection of hazardous runoff, specifically hydrocarbons, and is ideal for decontamination after oil spill response operations. The tank features inflatable air walls that can be rapidly filled with air for immediate use in emergency operations. Monsun valves are easy to operate and are suitable to use with most air inflators, including the New Naval Air Inflator.

- The capacity of the tank is 5 m³
- The dimensions of the inflated tank are: 5.00 x 3.00 x 0.50 m
- The tank is manufactured from Polymer Alloy Coated Polyester
- The fabric is resistant to sea-water, UV radiation, chemical dispersant and hydrocarbons
- The tank folds up neatly for transportation and storage
- The system is designed to be easily cleaned

ENVIRONMENTAL USES

- Beaches
- Nearshore
- Ports & Harbors
- Offshore
- Vessels

TANK PACKAGE

- ScorTank
- ScorSafe Ground Mat (30,100)
- ScorAir Inflator
- Air Hoses
- Absorbents
