

Workboats & Response Vessels Response & Recovery Vessel Seaguardian 9.10

The Seaguardian 9.10 Response & Recovery Vessel is a high-speed craft designed to act as a support vessel to oil spill response and salvage operations. Her speed minimizes the time of the response from the initial call-out. A square shaped stern with internal rein-forcements and stainless steel connection points enable towing operations of booms and skimmers. A flat stern deck is furnished with attachments for the installation of response equipment. A bow platform provides access to the perimeter of the vessel. The vessel is built with a shallow draft allowing it to operate in both near shore and offshore environments.

| TECHNICAL SPECIFICATIONS | |
|------------------------------|--------------------------------|
| Length (LOA) | 9.90 m |
| Beam (Molded) | 3.30 m |
| Recovered Oil Storage Tanks | 3000 L |
| Operational Speed (min max.) | 1 – 19 knots |
| Hull Material | Glass Reinforced Plastic (GRP) |
| Hull Type | Monohull |
| Engines | 2 x 200 HP |

OPERATIONAL CAPABILITIES:

Oil Spill Response Support

Dispersant ApplicationRecovery Storage

ations

Support

Boom Deployment/Towing Oper-

Skimmer Deployment & Recovery

Salvage Operations/Emergency

EQUIPMENT OPTIONS:

Deck Crane

- Electric Generator
- Radar/GPS/Echo Sounder
- Personnel Accommodation
- Trailer for Road Transportation

TECHNICAL DATA

The vessel is driven by dual 200 HP engines and equipped with 3000 I storage tanks. An oil dispersant tank works in unison with optional spray arm systems such as the ScorSpray Oil Dispersant Spray Arms. The hull is constructed of heavy-duty Glass Reinforced Plastic (GRP). The vessel is built for oil spill response operations and emergency response, able to support larger supply Vessels in U/J Boom configurations and can also be used in Chemical Dispersant Spraying operations. The vessel is easily transported by trailer.

KEY FEATURES:

- Rapid response vessel
- · Designed for oil spill response and support operations
- · Storage and oil dispersant tanks
- Designed to deploy oil spill response equipment and tow/manage equipment during response operations
- · Stern deck outfitted to hold oil spill response equipment
