

New Naval

Minimize Risk.
Maximize Safety.

**Scorpion Sorbents
& Spill Response Kits**

New Naval

From Spill to Safe – Contain It. Clean It. Control It

New Naval manufactures a complete range of sorbents and spill response solutions, including Oil Only, Universal, Chemical, Antistatic, Organic Sorbents, and Spill Kits such as the TerraBlock Series. All products are proudly made in the EU, tested by the University of Thessaly, and supported by ISO-certified procedures

✔ Why Choose New Naval?

- Proudly made in Greece/EU
- ISO certified manufacturing and packaging
- Certified sorption performance by the University of Thessaly
- Custom branding & flexible manufacturing
- Permanent stock availability and fast response times
- Sustainable, non-toxic, reusable sorbent solutions
- Performance/High Sorbency – high strength, abrasion resistance

New Naval Scorpion Sorbents Selection & Application Guide

This section provides practical guidance for selecting the right Scorpion Sorbent products for various applications. It draws on best practices and visual guides to ensure optimal decision-making for spill control preparedness.

Choosing the Right Absorbents for Your Application

Step 1: Know What You're Absorbing

Oil-Only – For oils and petroleum-based fluids. Floats on water and repels water.

Universal – For coolants, solvents, and water-based fluids. Great for general maintenance.

Chemical – For acids, alkalis, and aggressive or unknown chemicals. Chemically inert.

Step 2: Identify Your Absorbent Application

Pads & Rolls – General cleanup of leaks and spills. Rolls can be perforated to size.

Socks & Booms – Encircle spill areas or drains; ideal for equipment leaks.

Pillows – High-volume leaks under tanks, drums, or machinery.

Granules – Uneven surfaces or outdoor environments.

Step 3: Choose Size and Weight

Lightweight – Small drips or routine maintenance

Medium – General use across shop floors and facilities

Heavyweight – Large spills or hazardous containment

Application Guidance Table

INCIDENT	PADS & ROLLS	PILLOWS	SOCKS	BOOMS
Leaks from machines that run into walkways.			✓	
Drips from pipes, valves and glands etc.	✓	✓		
Overspray from machinery.	✓			
Leaks & drips from conveyor belts.	✓			
Lining parts bins, trolleys, or shelves etc.	✓			
Drips & splashes from dip tanks & parts washers.	✓	✓		
Spills from over full drip trays.		✓	✓	
Spills & leaks in labs/test facilities.	✓	✓	✓	
Leaking Drums/IBCs.	✓	✓	✓	✓
Leaks & spills at fuel pumps.	✓	✓	✓	✓

Oil-Only Sorbents

New Naval

Product Overview

☑ Engineered to absorb oil, not water.

Lightweight and hydrophobic – perfect for marine, offshore, and industrial spills.

☑ Quick response for oil emergencies and small operational leaks.

Lightweight and hydrophobic – perfect for marine, offshore, and industrial spills.

New Naval's Scorpion Oil-Only Sorbents set the industry standard in hydrocarbon recovery. With unmatched hydrophobic performance, they absorb oil while repelling water, even when fully saturated.

Scorpion Oil-Only Sorbents are made of 100% non-woven, melt-blown polypropylene and are engineered to absorb hydrocarbons without taking in water. Their extreme hydrophobic and oleophilic properties allow them to float even when fully saturated, making them ideal for both land and marine spill response operations.

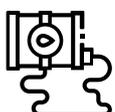

Used for nearshore marine operations, small operational leaks at sea or even on roads, industrial floors, docks, harbors, and open waters. Suitable for everyday operations or emergency response, including vessel spills, and maintenance areas.

⊕ Key Features

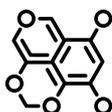

- Absorbs up to 25x its weight in hydrocarbons
- Floats on water even when saturated
- Flame-resistant and incinerable (<0.02% ash)
- Suitable for use on flat surfaces, puddles, shallow water, or within boom systems
- Sorbency Certified by the University of Thessaly (ASTM F716/ F726 tests)

Universal Sorbents

New Naval

Product Overview

☑ One product, multiple applications.

For oils, coolants, water, and more – perfect for workshops and daily maintenance.

☑ Designed for flexibility. Built for reliability.

Absorbs nearly anything without compromise.

Scorpion Universal Sorbents provide general-purpose spill control for oils, coolants, water-based liquids, and solvents. Their versatile construction allows them to tackle mixed spills on a wide variety of surfaces.

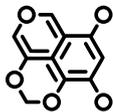

Ideal for factory floors, garages, mechanical workshops, construction sites, or logistical facilities where oil and water-based fluids may be present.

+ Key Features

- Made from durable, hydrophilic polypropylene
- Designed to absorb both water- and oil-based fluids
- Available in pads, rolls, socks, and pillows
- Color-coded grey for non-hazardous application

Chemical Sorbents

New Naval

Product Overview

✔ Bright, safe, and chemically resistant.

Handles aggressive fluids with confidence in labs, factories, and transport.

✔ The standard in hazardous spill control.

High-performance sorbents for unpredictable environments.

Scorpion Chemical Sorbents are designed for aggressive and hazardous liquids, including acids, solvents, and bases. Manufactured from polypropylene with special treatments, they offer fast, safe absorption and are available in pads, rolls, socks, and pillows.

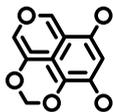

Used in chemical plants, labs, transport hubs, and any facility handling corrosive or unknown chemical substances. Effective on land or controlled water surfaces.

⊕ Key Features

- Absorbs up to 25x its weight in chemical spills
- Suitable for a wide range of aggressive substances
- Non-toxic and incinerable
- Available in high-visibility yellow for hazard recognition
- Reusable up to 5 times depending on application

Antistatic Sorbents

Product Overview

☑ Antistatic protection when it matters most.

For ATEX and flammable zones – protects people, facilities, and assets.

☑ Absorption meets explosion risk control.

Because even cleanup needs to be certified safe.

Scorpion Antistatic Sorbents are developed for safe spill control in environments where static discharge can pose a risk — such as fuel handling, refineries, chemical processing plants, and areas with flammable vapors. They are treated to dissipate electrostatic charge.

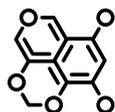

Used where static buildup may ignite flammable liquids or vapors. Suitable for both hydrocarbon-only (white) and general-purpose (red) spills.

⊕ Key Features

- Treated for static dissipation (ESD-safe)
- Available in pads and rolls
- Red versions feature high visibility and reflectors for enhanced safety
- Designed for use in explosive atmospheres (ATEX zones)

Organic Sorbents

New Naval

Product Overview

New Naval's OWL Absorbent-Cleaning products are 100% organic sorbents made from natural peat fibers. These bio-based, ultra-lightweight agents offer exceptional sorption capacity and environmental compatibility.

Perfect for land use, soil remediation, chemical recovery, and even organic fluids like blood or oil-based paints. Can be applied and swept up with minimal environmental impact.

+ Key Features

- Absorbs hydrocarbons, chemicals, paints, and more
- Up to 10x its weight in absorption
- Reusable up to 5 times until saturated
- Anti-carcinogenic, non-toxic, biodegradable
- Suitable for sensitive environments (e.g., public roads, hospitals)

Product	Form	Volume	Weight	Packaging	Use
Peat Sorbent	Bag	5L	0.75kg	1 Pc.	General Purpose

Granules & Particulates

Product Overview

Scorpion Granules (Perlite-based) and Particulates (Polypropylene-based) offer fast, effective absorption of spills on hard surfaces. Easy to deploy, these materials enhance traction while preventing fluid spread.

Used in warehouses, industrial plants, fuel stations, and roadways to treat oil or chemical spills on concrete, asphalt, or other firm ground.

+ Key Features

- Fast-acting granular format
- 1–3 mm Perlite or 8 mm PP variants
- Flame-resistant and incinerable
- Easy manual or mechanical distribution

Product	Type	Grain Size	Weight	Packaging	Use
Scorpion Granules	Perlite	1–3 mm	20 kg	1 Bag	Oil Spills (Land)
Peat Sorbent	PP	8 mm	10 kg	1 Bag	Oil Spills (Land)

Oil Spill Kits

New Naval

Oil Spill Kit Bags

New Naval's Oil Spill Kits in bags provide compact, ready-to-deploy response packages for small to medium hydrocarbon spills on land and water. Packed in rugged zipper or PVC bags, each kit contains high-quality Scorpion Oil-Only sorbents, personal protective equipment (PPE), and waste disposal materials.

Ideal for vehicle fleets, small workshops, marinas, transport terminals, and industrial sites. Designed for rapid deployment in case of leaks, drips, or minor spills.

+ Key Features

- Multiple sizes: 27L, 73L, 80L, 90L, 160L, 165L
- Include pads (P-100L), pillows (P-4545, P-5020), booms (P-3010, P-7510), and organic sorbents
- Compact and lightweight for storage in vehicles or small spaces
- Packed with PPE (gloves, goggles) and cable ties for secure disposal

Quick Response Spill Kits

These mid-size spill kits come pre-packed in wheeled bins for enhanced mobility and larger volume capacity. Designed for quick deployment in industrial environments, logistics yards, ports, and maintenance areas.

Suitable for incidents involving larger volumes of oil and fuel, particularly when mobility and speed are critical to controlling a spill.

+ Key Features

- Sizes: 130Lt, 160Lt, 190Lt, and 270Lt
- Contain a comprehensive mix of sorbents including pads, rolls (P-4448P), booms (P-3010, P-7510, P-5020), and disposal tools
- Wheeled bin design for easy transport to spill site
- Include protective equipment and accessories like caution tape and cable ties

Marine OCS Spill Response Kits

The OCS (Oil Containment System) kits are compliant with MARPOL Annex I Regulation 37, offering oil spill solutions for vessels over 150 GT and 400 GT. Designed to remain on board and be used in emergency response to marine spills.

For tankers and vessels requiring a 7 or 12-barrel spill kit under international marine pollution regulations. Also suitable for ports, shipyards, and bunkering stations.

⊕ Key Features

- Sizes: OCS 2, OCS 7, and OCS 12 barrel capacity
- Heavy-duty cylindrical or rectangular containers (200Lt, 700Lt, 1200Lt)
- Equipped with oil pads (P-100L), oil traps, booms (P-3010, P-5020), mops, shovels, PPE, and hand pumps
- Designed for large-scale containment and recovery operations
- All components easily accessed and re-stockable

TerraBlock Land Spill Kits

New Naval

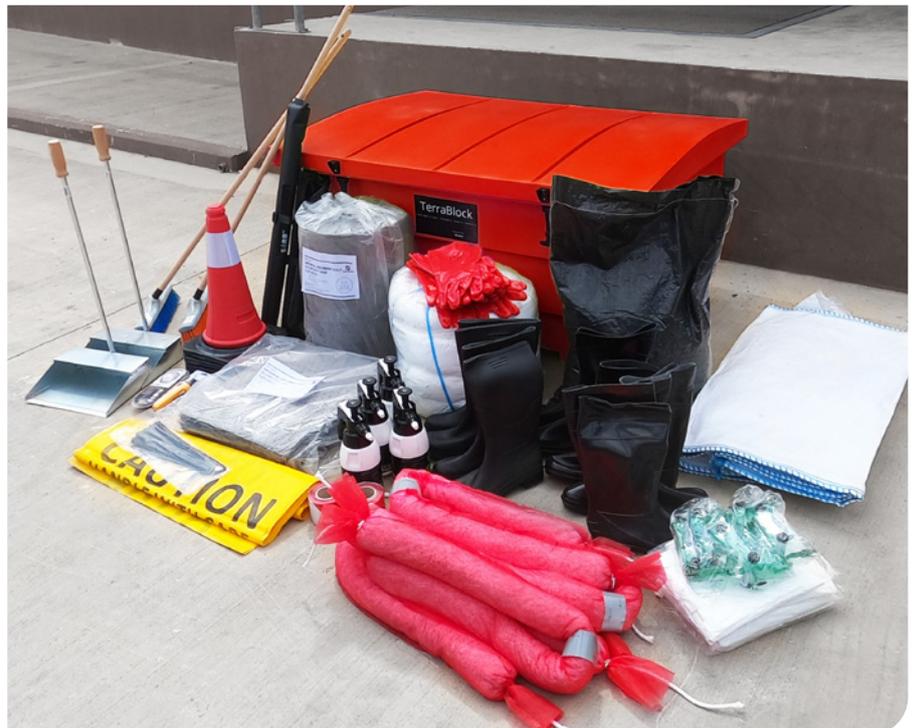

Overview

The TerraBlock Series is New Naval's line of premium land spill kits, combining high-performance sorbents with intelligent packaging for versatile, fast response to hazardous leaks and spills on soil, pavement, or industrial flooring.

Perfect for municipalities, utilities, contractors, warehouses, or any site managing chemicals, fuel, or oil overland.

+ Key Features

- Land/Soil Spill Response Kits available in 4 versions depending on operational needs: MICRO, COMPACT, STANDARD, ADVANCED
- Designed for immediate and effective response and containment of petroleum and mild chemical spills on land and all soil types.
- Supplied with essential equipment such as sorbents, gloves, and disposal bags
- Lightweight, stackable, and easy to store
- Ideal for Municipalities, Civil Protection, Fire Departments, Industries, and Emergency Response Teams.
- Minimizes risk of error and downtime – Response ready, no need for assembly or separate supplies .
- Including contents list and simple use instructions.
- Refill Kits available upon request
